

# Quality Commitment

Every detail is crucial

High quality products and trained personnel with excellent skills are key factors to success.

Focus on continuous improvement and playing a leading role in promoting best practices in our industries will benefit us as a lifesaving supplier. The specific practical improvements and modifications you find in our maritime equipment are a reflection of many years of experience. Maritime equipment from Noreq is made to be trusted and feedback from clients is crucial in our development.

The Quality Management System is implemented to fulfil requirements in NS-EN ISO 9001:2008 and Noreqs policies and Standards, thus ensuring that products and services meet customer requirements for Quality, Safety and value.
